BRAXOS

A Reporting and Administration suite designed to keep elevator access secure and provide key data

SECURE YOUR PROPERTY

Using LiftOff Commander, property managers can create floors groups that define who has access to which floors and when. Membership in a group can be based upon tenant, resident, or staff access rights within the building. Customize access so the right people only get access to the appropriate floors.

MONITOR YOUR USAGE

LiftOff Commander's monitoring dashboard allows you to watch who is making elevator calls, when and where, giving you true insight into elevator usage.
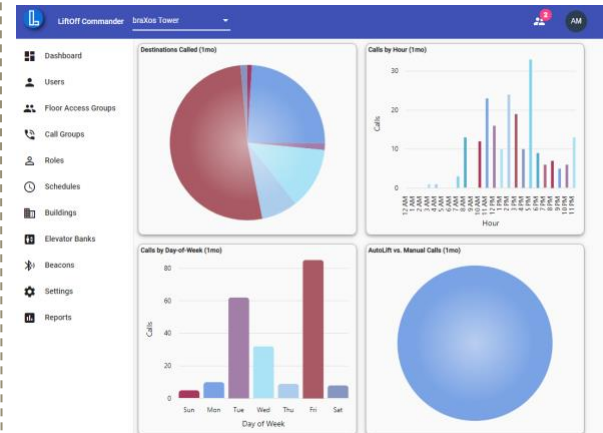

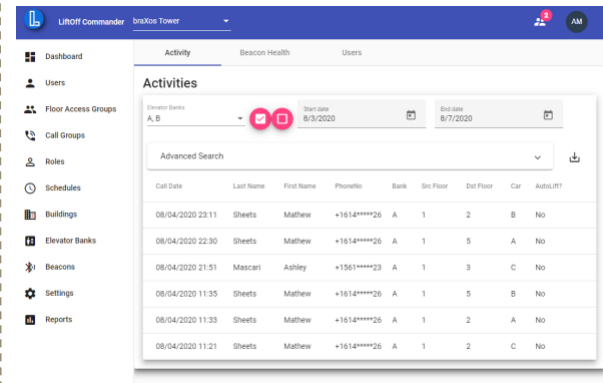

EASY TO USE

Smart and Intuitive. Define user access, grant users specific floor access, monitor beacon battery life all through LiftOff Commander.

CUSTOM SCHEDULES

Set up custom schedules so that LiftOff can only be utilized to call certain floors at certain times.

REPORTING

Report on LiftOff activity in the building. Track who called the elevator to what floor during a given period of time. Export CSVs and Excels to get information into your hands.
